

UJJAWAL SHRIVASTAV

Full Stack Developer

Ghaziabad, India • shriva.ujjawal@gmail.com • [+91 97187 32066](tel:+919718732066) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer shipping production-grade web applications across React, Next.js, FastAPI, Spring Boot, and PostgreSQL. Solo end-to-end track record covering schema design, REST APIs, real-time systems, authentication, and Vercel deployment. Stack-agnostic engineer — six months of disciplined AI-pair programming with Claude Code and GitHub Copilot have built fluency across multiple frameworks, enabling rapid ramp-up on unfamiliar tooling. Hands-on with Anthropic Claude and OpenAI APIs and modern DevOps practices.

TECHNICAL SKILLS

Languages	TypeScript, Python, Java, SQL
Frontend	React, Next.js (App Router, Turbopack), Tailwind CSS, Framer Motion, ReactFlow, Monaco Editor, HTML5, CSS3
Backend	Node.js, FastAPI, Java Spring Boot, Hibernate, JPA, RESTful APIs, Server-Sent Events, WebSockets
Databases	PostgreSQL, MySQL, Drizzle ORM, Prisma ORM, Neon, Firebase, schema design, query tuning
Auth & Pay	NextAuth / Auth.js v5, JWT, OAuth2, Email OTP, Stripe, Razorpay
AI / LLM	Anthropic Claude API, OpenAI API, LLM pipeline design, prompt engineering, Tree-sitter AST
DevOps	Git, GitHub Actions, Docker, Vercel, CI/CD, Sentry, Playwright e2e, Vitest unit testing
Tools	Postman, Claude Code, GitHub Copilot, Win32 API, Upstash Redis, Linux

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | [Amoha Codes](#) 4-Week Internship · 2025

- Architected production features in React + FastAPI for an enterprise SaaS platform.
- Designed authentication and authorization layers with session security, role-based access, and protected API routes.
- Shipped a real-time content management module with live progress tracking and granular state synchronization.
- Lifted team velocity by 40% by integrating Claude Code and GitHub Copilot and authoring shared prompt patterns.

KEY PROJECTS

Demo **EngiNerd — Agentic Learning Platform** [Live](#) · [Source](#)

- Stack:** Next.js 16 (Turbopack), TypeScript, Drizzle ORM, PostgreSQL, NextAuth v5, Anthropic Claude API, Tailwind CSS, Framer Motion, Upstash Redis, Sentry, Playwright, Vercel
- Solo-founded India-focused learning platform — marketing site, multi-step auth, dashboard with roadmaps, subjects, practice, cohorts, careers, billing, plus public `/u/[username]` profile pages.
 - Modeled domain in Drizzle ORM with type-safe migrations and edge-compatible queries; wired NextAuth v5 with email OTP and Google OAuth via Drizzle adapter.
 - Streamed AI agent endpoints powered by Anthropic Claude, with token-bucket rate limiting on Upstash Redis and resilient SSE clients on the frontend.
 - Crafted glass-morphism UI with Framer Motion micro-interactions, WCAG 2.1 AA audits, Hinglish-aware form validation; tuned Turbopack production builds.
 - Owned the release loop: Playwright e2e + Vitest unit suites, Sentry traces, GitHub Actions CI, zero-downtime Vercel deploys.

AI Prompt Enhancer Widget Windows desktop tool

- Stack:** Python, FastAPI, Win32 API, OpenAI / Anthropic LLM pipeline, Tkinter overlay
- Engineered a system-wide Windows overlay that rewrites prompts in real time, accessible from any active app without context-switching.
 - Authored an LLM enhancement engine that parses user intent, restructures vague prompts into role/task/constraint format, and ranks variants by clarity.
 - Implemented “Magic Paste” via Win32 keyboard hooks and clipboard injection — enhanced text lands directly into ChatGPT, Claude, Cursor, or any focused window.
 - Drove global hotkey handling and inter-app communication through Win32 message-loop integration plus a lightweight FastAPI background service.

EDUCATION

B.Tech — Computer Science (AI & ML) Krishna Engineering College, Ghaziabad · 2022 – 2025

CERTIFICATIONS & ACHIEVEMENTS

- Java Full Stack Developer Certification — Ducat (8-month intensive program)
- AI Certification — ICT Academy
- Active open-source GitHub portfolio: a dozen+ self-shipped products spanning Next.js, FastAPI, Spring Boot, and Python desktop tooling
